Animalfeeds-Mexico selects batches of fishmeal based on Monterey Sardine and Pacific Sardine (MSC-certified until 2023 - *Ophistonema spp/ Sardinops sagax*, FAO-Area 77) whose specifications reach the highest levels of efficiency in food manufacturing for fish.

Certificate of Origin and a strict pre-shipment quality control carried out by our technical team based in Guaymas, the main fishing port in the Gulf of California of the Mexican Pacific, allow us to guarantee a selected product that meets the standards contracted by the manufacturers of feed for aquaculture (salmon, shrimp and farmed fish).

Animalfeeds-Mexico, as an exporter, provides Certificate of Origin and official health documentation issued by the Animal Division of the Secretary of Agriculture (Sagarpa).
